SUMMARY

Product and operations builder with a track record of shipping the systems he runs the business on. Designed and deployed a production Transport Management System (TMS) solo from concept to live across 4 branches and 13 users using AI-assisted development. Combines full ownership of a 25+ clientele 3PL operation (P&L, vendor management, client reporting) with hands on build capability, KPI design, and data integrity at scale. Currently targeting product roles in tech, supply chain, and AI-native product teams.

SKILLS

Business Systems Analysis, AI-Assisted Development, Product Requirements & Rollout, Data Auditing & Integrity, KPI Design & Reporting, Process Improvement, Stakeholder & Client Management, Business Development, Market & Competitive Analysis, SQL, Python, Snowflake, A/B Testing, React, Cloudflare (Workers, D1, Pages), Excel/Google Sheets (Advanced), Tableau, Power BI, Looker

PROFESSIONAL EXPERIENCE

Garuda Glide Bengaluru, India

Product & Operations Lead Oct 2025 – Present

- Designed and built a proprietary Transport Management System using AI-assisted development (Claude Code), taking it from concept to production, eliminating 3 hours of manual data entry daily across a 13-person operations and dispatch team.
- Onboarded 13 employees onto the TMS across 4 branches, completing rollout per branch in under 2 weeks with zero disruption to daily operations.
- Conduct daily data audits (via Claude Code) on job-detail and billing accuracy, improving overall data accuracy by 27% since TMS production launch and catching a billing error that saved ₹1.24L in a single month.
- Deliver monthly performance dashboards across 29 client accounts shipping through DHL, translating operations data into client-facing reviews that have supported new client acquisition through demonstrated success rates.
- Oversee 5 client managers across 2 branches, identifying and implementing process improvements to resolve recurring operational setbacks.

Strategy Analyst Feb 2025 – Oct 2025

- Designed Monthly KPI dashboards enabling cross-customer analysis of delivery metrics across 24 client accounts, improving performance monitoring for operations and strengthening vendor credibility to support future business development.

Fidelity Investments Boston, MA, USA

Data Analytics & Insights Co-op Jan 2024 – July 2024

- Ran an A/B testing initiative for email campaigns that improved open rates by 33% and CTR by 5%, by identifying target segments and campaign hypotheses.
- Collaborated with engineering teams to define requirements for a machine learning-based customer segmentation initiative, enabling personalized website experiences for two distinct visitor cohorts contributing to a 6% improvement in Account Opening Conversion Rate (AOCR).
- Analyzed 300+ customer attributes to enhance customer classification, achieving an 8% increase in targeted marketing strategies for advanced traders and high net worth individuals.

AmalgamRx Wilmington, DE, USA

Customer Insights Analyst Intern Jan 2022 – Sept 2022

- Analyze patient and provider datasets to identify key revenue drivers, contributing to 15% month-over-month growth in recurring revenue.

Netlog Express Bengaluru, India

Operations Analyst Intern Jan 2021 – Dec 2021

- Supported forecasting and budget planning for ₹20L+ in operational spend, improving budgeting accuracy by 15%; ran root cause analysis across 1,500+ SKUs that reduced inventory errors by 7%.
